 code practice

## Java > String-1 > firstHalf

[prev](#) | [next](#) | [chance](#)

id/email

password

[forgot password](#)[create account](#)

Given a string of even length, return the first half. So the string "WooHoo" yields "Woo".

firstHalf("WooHoo") → "Woo"

firstHalf("HelloThere") → "Hello"

firstHalf("abcdef") → "abc"

...Save, Compile, Run

```
public String firstHalf(String str) {  
  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-1](#)
