Given a string and an int N, return a string made of N repetitions of the last N characters of the string. You may assume that N is between 0 and the length of the string, inclusive.

repeatEnd("Hello", 3) → "lollollo"

repeatEnd("Hello", 2) → "lolo"

repeatEnd("Hello", 1) → "o"

...Save, Compile, Run

```
public String repeatEnd(String str, int n) {  
    }  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-2](#)
