Given a non-empty array of ints, return a new array containing the elements from the original array that come after the last 4 in the original array. The original array will contain at least one 4. Note that it is valid in java to create an array of length 0.

post4({2, 4, 1, 2}) → {1, 2}

post4({4, 1, 4, 2}) → {2}

post4({4, 4, 1, 2, 3}) → {1, 2, 3}

...Save, Compile, Run

```
public int[] post4(int[] nums) {  
  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [Array-2](#)[Forget It!](#) -- delete my code for this problem
