Return the number of even ints in the given array. Note: the % "mod" operator computes the remainder, e.g. 5 % 2 is 1.

`countEvens({2, 1, 2, 3, 4}) → 3``countEvens({2, 2, 0}) → 3``countEvens({1, 3, 5}) → 0`

...Save, Compile, Run

```
public int countEvens(int[] nums) {  
    }  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [Array-2](#)[Forget It!](#) -- delete my code for this problem
