[forgot password](#)[create account](#)

Given a string and a non-empty **word** string, return a version of the original String where all chars have been replaced by pluses ("+"), except for appearances of the word string which are preserved unchanged.

plusOut("12xy34", "xy") → "++xy++"

plusOut("12xy34", "1") → "1++++"

plusOut("12xy34xyabcxy", "xy") → "++xy++xy+++xy"

...Save, Compile, Run

```
public String plusOut(String str, String word) {  
    }  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-2](#)[Forget It!](#) -- delete my code for this problem
