Given a string, return true if "bad" appears starting at index 0 or 1 in the string, such as with "badxxx" or "xbadxx" but not "xxbadxx". The string may be any length, including 0. Note: use .equals() to compare 2 strings.

hasBad("badxx") → true
hasBad("xbadxx") → true
hasBad("xxbadxx") → false

...Save, Compile, Run

```
public boolean hasBad(String str) {  
  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-1](#)[Forget It!](#) -- delete my code for this problem
