Return an array that is "left shifted" by one -- so {6, 2, 5, 3} returns {2, 5, 3, 6}. You may modify and return the given array, or return a new array.

shiftLeft({6, 2, 5, 3}) → {2, 5, 3, 6}

shiftLeft({1, 2}) → {2, 1}

shiftLeft({1}) → {1}

...Save, Compile, Run

```
public int[] shiftLeft(int[] nums) {  
  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [Array-2](#)
