Given a string, return a string length 1 from its front, unless **front** is false, in which case return a string length 1 from its back. The string will be non-empty.

theEnd("Hello", true) → "H"

theEnd("Hello", false) → "o"

theEnd("oh", true) → "o"

...Save, Compile, Run

```
public String theEnd(String str, boolean front) {  
  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-1](#)
