Given a string, consider the prefix string made of the first N chars of the string. Does that prefix string appear somewhere else in the string? Assume that the string is not empty and that N is in the range 1..str.length().

`prefixAgain("abXYabc", 1) → true``prefixAgain("abXYabc", 2) → true``prefixAgain("abXYabc", 3) → false`

...Save, Compile, Run

```
public boolean prefixAgain(String str, int n) {  
    }  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-2](#)[Forget It!](#) -- delete my code for this problem
