Given a string and an int n, return a string made of the first n characters of the string, followed by the first n-1 characters of the string, and so on. You may assume that n is between 0 and the length of the string, inclusive (i.e. n >= 0 and n <= str.length()).

repeatFront("Chocolate", 4) → "ChocChoChC"

repeatFront("Chocolate", 3) → "ChoChC"

repeatFront("Ice Cream", 2) → "IcI"

...Save, Compile, Run

```
public String repeatFront(String str, int n) {  
    }  
}
```

Show output only (no red/green) ☐[prev](#) | [next](#) | [chance](#) | [CodingBat](#) > [String-2](#)[Forget It!](#) -- delete my code for this problem
