CodingBat code practice

Java > Array-1 > sum3

Given an array of ints length 3, return the sum of all the elements.

sum3({1, 2, 3}) → 6
sum3({5, 11, 2}) → 18
sum3({7, 0, 0}) → 7

Go

...Save, Compile, Run

```
public int sum3(int[] nums) {

}
```

Go

Show output only (no red/green) ☐
