Java > String-3 > gHappy

We'll say that a lowercase 'g' in a string is "happy" if there is another 'g' immediately to its left or right. Return true if all the g's in the given string are happy.

gHappy("xxggxx") → true
gHappy("xxgxx") → false
gHappy("xxggyygxx") → false

| Go | ...Save, Compile, Run |

```
public boolean gHappy(String str) {

}
```

| Go |

Show output only (no red/green) ☐
