CodingBat code practice

Java > String-2 > repeatSeparator

prev | next | chance

Given two strings, **word** and a **separator**, return a big string made of **count** occurences of the word, separated by the separator string.

repeatSeparator("Word", "X", 3) → "WordXWordXWord"
repeatSeparator("This", "And", 2) → "ThisAndThis"
repeatSeparator("This", "And", 1) → "This"

| Go | ...Save, Compile, Run

```
public String repeatSeparator(String word, String sep, int count) {

}
```

| Go |

Show output only (no red/green) ☐

prev | next | chance | CodingBat > String-2
