# CodingBat code practice

## Java > String-1 > seeColor
prev | next | chance

Given a string, if the string begins with "red" or "blue" return that color string, otherwise return the empty string.

seeColor("redxx") → "red"
seeColor("xxred") → ""
seeColor("blueTimes") → "blue"

Go        ...Save, Compile, Run

```
public String seeColor(String str) {

}
```

Go

Show output only (no red/green) ☐

prev | next | chance | CodingBat > String-1
